

ADARSH ACHARYA

Junior Software Developer | WordPress, PHP, React, Node.js

Pune , Maharashtra | +91 72497 90688 | adarshacharya7830@gmail.com | <https://mriga.adarshacharya.workers.dev/> | [linkedin.com/in/adarshacharya1842](https://www.linkedin.com/in/adarshacharya1842)

SUMMARY

Junior Software Developer with 1.5 years of experience building production backend features, API integrations, and AI-driven automation pipelines. Proficient in Python, JavaScript, PHP, SQL, and C++ with 800+ LeetCode problems solved. Hands-on experience developing low-latency voice daemons (Whisper, Linux /dev/uinput), automated RAG multimedia engines, relational database optimizations, and Playwright test suites.

TECHNICAL SKILLS

Languages	C++, PHP, JavaScript, HTML, CSS, SQL, Python
Frontend	React, jQuery, responsive UI, CSS animations, Intersection Observer API, Swiper JS, Tailwind CSS
Backend/CMS	WordPress plugin development, Event Espresso, Elementor, Node.js, REST API basics, JWT basics, authentication flows
Databases	MySQL, PostgreSQL, query optimization, CSV data processing, SQL Caching Tables
Tools/Cloud	Claude, Antigravity , Git, GitHub, Docker basics, AWS basics, Playwright, Twilio, Google Drive integration, Linux

EXPERIENCE

Junior Software Developer - UniversaltechRemote | June 2025 – May 2026

EdTech and certified driver safety training portal | [Website](#)

- Built a WordPress/Event Espresso attendance confirmation system using configurable cron schedules, `wp_mail()`, Twilio SMS, Twilio response webhooks and admin-side response tracking.
- Developed an admin dashboard to record notification delivery, attendee responses and registration status so event teams could follow up from one WordPress panel.
- Built a fuzzy scoring matching algorithm for CSV bulk imports that reconciles student registrations against physical records using weighted field analysis (Email: 70%, Phone: 50%, Names: 40%), auto-approving matches at $\geq 90\%$ and queuing ambiguous matches ($\geq 60\%$) for manual review.
- Customized Event Espresso registration and checkout behavior using WordPress actions, filters and plugin extension points while preserving compatibility with core plugin flows.
- Integrated an internal e-sign agreement product with the registration workflow and Google Drive storage for signed agreement documents.
- Created filter, search, and pagination interfaces across admin and user-facing data views using PHP, SQL, JavaScript, jQuery, HTML, and CSS.
- Used Claude with Figma design context to create GlobalSpaces planning documentation, including architecture notes, UI design specs, component specs, user flows and landing-page plans.
- Used Playwright for scraping/testing and automation of registration flows.

Software Developer Intern - UniversaltechRemote | January 2025 – June 2025

- Completed training in Git/GitHub workflows, Agile development frameworks, and WordPress core architecture including actions, filters, and plugin extension lifecycle events.

PROJECTS

Spic – Native Low-Latency Linux Voice Copilot | [GITHUB](#)

AI Agent | Python | PipeWire | Whisper | Linux Kernel (/dev/uinput) | Ollama

- Engineered an ultra-low latency (<300ms) background daemon in Python for 100% local speech-to-text processing using PipeWire raw PCM streaming, energy-based VAD, and CPU-quantized (int8) faster-whisper.
- Bypassed Wayland desktop sandboxing by building a Linux Kernel /dev/uinput virtual hardware keyboard driver, enabling direct keystroke injection at 1.5ms/char with a hands-free "Tap-to-Start, Action-to-Finish" activity watcher.

Automated LeetCode Video Generation Pipeline | [GITHUB](#)

AI Agent | Python | Manim | FFmpeg | GraphQL | SQLite | LLMs | RAG

- Built an automated video production engine in Python that translates coding submissions into animated YouTube tutorials using LLM-driven scripting and programmatic Manim scene generation.
- Engineered an audio-visual timestamp syncing scheduler using FFmpeg, an automated YouTube upload integration, and fault-tolerant pipeline state management validated across 328 tests.

EDUCATION

Bachelor of Technology in Computer Science - Vishwakarma Institute of Technology, Pune2020 - 2024 | 8.2 CGPA

CERTIFICATIONS

- AI Fluency: Framework & Foundations by Anthropic (JUNE 2026)
 - Claude Code 101 by Anthropic (JUNE 2026)
- <https://verify.skilljar.com/c/qea4obhxj8zc>
<https://verify.skilljar.com/c/f6afcdxjhboz>

ADDITIONAL

- DSA & Competitive Programming : 800+ LeetCode problems solved, plus additional practice on other platforms.
