

ADARSH ACHARYA

Junior Software Developer | WordPress, PHP, React, Node.js

Shrirampur, Maharashtra +91 72497 90688 adarshacharya7830@gmail.com [linkedin.com/in/adarshacharya1842](https://www.linkedin.com/in/adarshacharya1842) github.com/Adarsh1842

SUMMARY

Junior Software Developer with 1.5 years of experience building production WordPress and Event Espresso features, admin workflows, registration automation, third-party integrations and responsive frontend interfaces. Strong in PHP, JavaScript, SQL and C++ with 700+ LeetCode problems solved and hands-on experience debugging real plugin flows, cron jobs, webhooks, CSV imports and Playwright automation.

TECHNICAL SKILLS

Languages	C++, PHP, JavaScript, HTML, CSS, SQL
Frontend	React, jQuery, responsive UI, CSS animations, Intersection Observer API
Backend/CMS	WordPress plugin development, Event Espresso, Elementor, Node.js, REST API basics, JWT basics, authentication flows
Databases	MySQL, PostgreSQL, query optimization, CSV data processing
Tools/Cloud	Git, GitHub, Docker basics, AWS basics, Playwright, Twilio, Google Drive integration, Linux

EXPERIENCE

Junior Software Developer - Universaltech

Remote | 1 year full-time + 6 month internship

- Built a WordPress/Event Espresso attendance confirmation system using configurable cron schedules, `wp_mail()`, Twilio SMS, Twilio response webhooks and admin-side response tracking.
- Developed an admin dashboard to record notification delivery, attendee responses and registration status so event teams could follow up from one WordPress panel.
- Created a bulk e-course completion import tool for motorcycle course registrations with CSV upload, parsing, license/email/name-phone matching priority, duplicate review and registration updates.
- Customized Event Espresso registration and checkout behavior using WordPress actions, filters and plugin extension points while preserving compatibility with core plugin flows.
- Integrated an internal e-sign agreement product with the registration workflow and Google Drive storage for signed agreement documents.
- Built filter, search and pagination interfaces across admin/user-facing data views using PHP, SQL, JavaScript, jQuery, HTML and CSS.
- Used Claude with Figma design context to create GlobalSpaces planning documentation, including architecture notes, UI design specs, component specs, user flows and landing-page plans; development had not started.
- Used Playwright for scraping/testing and automation of registration flows.

PROJECTS

Automatic Music Generation using LSTM and Markov Chain Model

ICTIS 2023

Built a probabilistic music generation system using LSTM and Markov Chain concepts; presented at the 7th International Conference on Information and Communication Technology for Intelligent Systems.

Client-Server Air Condition Monitoring System

SQL | Dashboard

Developed a monitoring system that captured and stored 10,000+ environmental data points per day and exposed real-time analysis through a frontend dashboard.

ML Model Deployment on AWS Cloud

AWS SageMaker | Lambda | SNS

Configured an ML model workflow using AWS SageMaker, Lambda and SNS email notifications to demonstrate basic cloud deployment and alerting.

EDUCATION

Bachelor of Technology in Computer Science - Vishwakarma Institute of Technology, Pune

2020 - 2024 | 8.2 CGPA

ADDITIONAL

- DSA: 800+ LeetCode problems solved, plus additional practice on other platforms.
